What is a Die Cutting ?

Die cutting is the process of using a die to shear webs of low-strength materials, such as rubber, fiber, foil, cloth, paper, corrugated fiberboard, paperboard, plastics, pressure-sensitive adhesive tapes, foam and sheet metal.

Product Size and Form

Die cuts generally come in rolls or individual pieces of 1000 and can be cut or shaped into almost any form to meet specialized requirements.

Ovals, circles, dinky dots, foam blocks, squares, strips, and various other custom shapes

Features

- * Convenient and time saving.
- * Multi roll lamination and die cutting.
- * Laminating, die cutting and weaving all in one process.
- * Speeds up production and lowers costs.
