What is Double Sided PVC Tape?

Double-sided tape is any pressure sensitive tape that is coated with adhesive on both sides. It is designed to stick two surfaces together, often in a way which is not visible in the end product due to it being in between the objects rather than overlaying them.

A clear / white PVC material coated on both sides with a solvent based acrylic adhesive.

Uses

Joining plastic and metal components, Nameplates & Foam laminations. Demanding applications where long term adhesion is required. Resists migration of Oils
