Double Sided Tape

Polyester

What is Double Sided Polyester Tape?

Double-sided tape is any pressure sensitive tape that is coated with adhesive on both sides. It is designed to stick two surfaces together, often in a way which is not visible in the end product due to it being in between the objects rather than overlaying them.

A tough translucent polyester film coated on both sides with a high tack aggressive clear acrylic adhesive and laminated to easily removable moisture stable white silicone paper liner.

Uses

A wide variety of surface to surface laminations from Automotive to decorative applications. Due to its excellent ageing resistance and impressive temperature range this is one of the most versatile adhesive tapes currently available on the market today. Print finishing and Nameplate Mounting

Product Size and Form

The standard length is 33m, also available in 50m, 100m and 1000m lengths, and available widths of 6mm, 12mm, 18mm, 24mm, 36mm, 48mm, 72mm, 96mm and 144mm. Other sizes available on request

Features

- * High Tack Adhesive - Provides good initial adhesion to a wide variety of substrates.
- * High weight adhesive coating - Allows for maximum bonding strength to textured surfaces

These products should be tested before use, to ensure suitability for intended application. Should you require technical assistance, please contact our technical service department. Easitape is a South African Manufacturer & Supplier of Tapes
