Double Sided Tape Splicing Tape

What is Double Sided Splicing Tape?

Double-sided tape is any pressure sensitive tape that is coated with adhesive on both sides. It is designed to stick two surfaces together, often in a way which is not visible in the end product due to it being in between the objects rather than overlaying them.

A general purpose double sided splicing tape with a non-woven tissue carrier and a solvent-based acrylic adhesive.

Uses

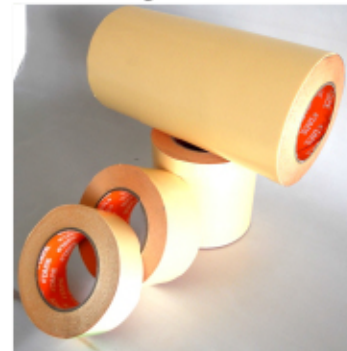

Ideal for use on kraft papers and in corrugating plants, particularly difficult coated boards.

Product Size and Form

The standard length is 33m, also available in 50m, and available in widths of 24mm, 36mm, 48mm, 72mm, 96mm and 144mm. Other sizes available on request.

Features

- * Aggressive adhesion to most surfaces, fast grab and rapid adhesion build – suitable for flying splices on papers and boards.
- * Good shear properties and high temperature resistance
- * Good adhesion to many calendered and coated surfaces
- ideally suited to bonding boards with high levels of recycled fibre i.e corrugators.

These products should be tested before use, to ensure suitability for intended application. Should you require technical assistance, please contact our technical service department. Easitape is a South African Manufacturer & Supplier of Tapes
