Double Sided Tape Tissue

What is Double Sided Tissue Tape?

Double-sided tape is any pressure sensitive tape that is coated with adhesive on both sides. It is designed to stick two surfaces together, often in a way which is not visible in the end product due to it being in between the objects rather than overlaying them..

A tissue material coated on both sides with a solvent based acrylic adhesive.

Uses

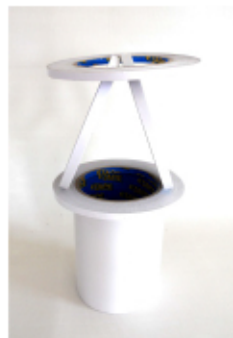

Joining plastic and metal components, Nameplates & Foam laminations. Print finishing of Cosmetic packaging, Joining of leather, PVC films, Fabric jointing, High value PE and Paper Bags
